

GLOBAL INFORMATIONS

<p>DESCRIPTIONS AND USE</p>	<p>The scented card is made in perfumed composite resin. It's 100% polymere material. Without alcohol, the fragrance is integrated directly by injection in the material. The scented car is fixed by a ribbon on a support: mirror, door handle, wardrobe... The olfactory effectiveness of this scented card corresponds to a duration of approximately one month, depending on its use from the moment when the scented card is removed from its waterproof packaging, and fixed on a support thanks to the ribbon (variable duration depending on the fragrance). The storage life under storage conditions between 10 and 35°C is 24 to 36 months. It permits a continue and autonomous diffusion of the fragrance. It transcribes all of the fragrance notes. The fragrance being directly integrated into the mass avoids any risk of sagging. Moreover, the soft touch effect offers one pleasant and sweet sensation.</p>
<p>PHYSICAL CHARACTERISTICS</p>	<p>Rectangular form, delivered with one ribbon which permits the fixation of the scented card on the chosen support. Sizes : 180 x 80 x 3mm Weight : 23g Scented cards are inside one transparent polybag in order to avoid any loss of fragrance and preserve the products.</p>
<p>FRAGRANCES</p>	<p>Unlike air fresheners, made up of 4 molecules, iMAO parfums® scented cards are produced from real perfume and are made up of 40 molecules.
